

# Moral Development

# Piaget's idea (1965)

---

- 他律道德 (**heteronomous morality**) 或  
道德現實主義 (Moral realism)
  - Rules simply exist and can't be broken
  - Punishment is determined by how much the damage is done, not the intention of the child or other circumstances.
  
- 自律道德 (**autonomous morality**) 或  
合作道德 (Morality of cooperation)

As children interact with others, develop perspective taking abilities, and see different people have different rules.

  - People make rules and rules can be changed
  - When rules are broken, both damage and intention should be taken into account.

# Kohlberg's Stages of Moral Development

---

- Evaluation of moral reasoning
  - Presenting moral dilemmas or hypothetical situations in which people must make difficult decisions.
  - Subjects are asked what the person who is caught in the dilemma should do, and why.

# A man's dilemma

---

- A man's wife is dying. There is one drug that could save her, but it is very expensive, and the druggist who invented it will not sell it at a price low enough for the man to buy it. Finally, the man becomes desperate and considers stealing the drug for his wife. What should he do, and why?

# Possible answers

---

1. Based on one's perception:
  - It is wrong to steal because he may get caught.
2. Based on rules or laws:
  - It is wrong to steal because it is against the law.
  - It's right to steal because the man means well-he's trying to help his wife. But he will still have to pay the druggist when he can or accept the penalty for breaking the law.
3. Based on underlying values that's different from convention:
  - It is not wrong to steal because human life must be preserved. The worth of a human life is greater than the worth of property.

- 第二階段：相對功利取向/互惠  
瞭解他人也有需要，也會試著去符合他人需要，但是也希望同時滿足自己的需要。

# Criticism

---

- ❑ Moral behavior
  - Moral reasoning does not highly relate to moral behavior. Other factors affect behavior.
- ❑ Social conventions vs. moral issues
- ❑ In reality those stages are not separated, sequenced or consistent.
- ❑ Cultural differences in moral reasoning

  - Favor western white male individualism

# The morality of caring – difference between man and woman

---

- Carol Gilligan等人指出Kohlberg的道德發展階段不能充分說明女性的道德發展。
- 道德判斷：男性可能著重於正義取向（justice orientation），而女性可能被教導面對道德議題時要採取關懷取向（care orientation）及保持良好關係。
- 女性的轉化是經由三個階段（1）過度強調自我（2）過度強調他人（3）適當的人我關係。
  - 在第一階段時，自我是女性關心的唯一目標，關心自己的煩惱。
  - 透過與別人產生連結與參與社會，女性會逐漸發展出符合規範的（conventional）、撫育的（nurturant）、將善等同於自我犧牲的，並且壓抑自己對他人籲求的女性。
  - 當女性停止為支持他人而排斥自己的需要，並且同時認知此種過於在意他人錯誤與她與他人是相互連結時，才能進入第三階段。
